

INTRODUCING THE

STAGELINE SAM 555

## INNOVATION. SAFETY. SPEED. SIZE

Change and innovation are constant in the entertainment business. Premier Global Production is an innovator, ensuring outdoor events get the best equipment available for best price possible.

The **SAM 555** is a mobile monster of a stage with all the size of a steel structure packed nicely into the body of one trailer. Once parked at your festival or music event site, the trailer unfolds into a state-of-the-art stage. It takes a mere four hours to assemble. With one operator and only five stage hands, any event can have a fully operational 50'x38' (or up to 90'x56') stage ready to rock in the blink of an eye.

In life there are often compromises, but with the **SAM 555** there are none. With speed and mobility come the full amenities that are expected with a stage of this size.

With its unique cantilevered sound-wing system and patented telescopic column design, the best roof clearance and wind resistance

in the industry, the **SAM 555** is the largest and most rainproof mobile stage trailer in the world.

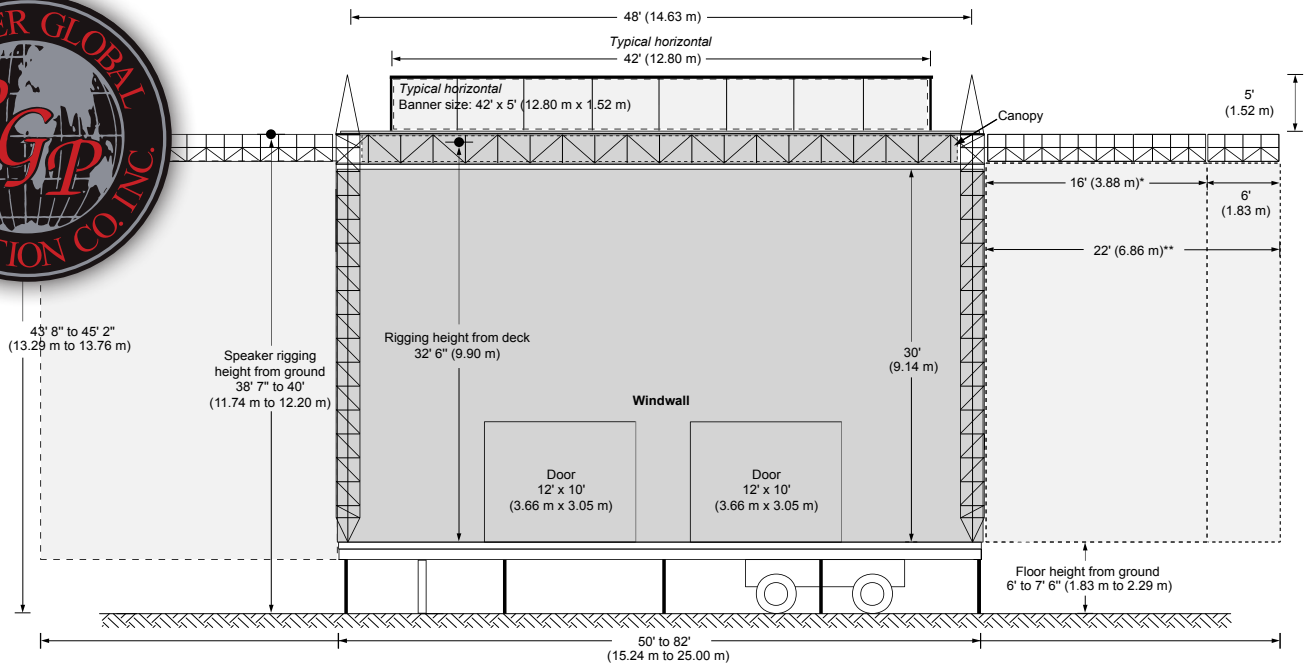

Safety is always a concern in the staging industry, but the **SAM 555** has any event covered. This mobile stage is built by Stageline, a company with 20 years experience in the mobile staging industry. The **SAM 555** is certified by professional engineers in every province and state in North America, and is rated for 90 mph (145km/h) winds without windwalls and 60mph (97km/h) with windwalls.

Nothing is overlooked on the **SAM 555**. Including the ability to increase revenues through advertising. With multiple banner sizes and options available, additional sponsorship or advertising revenues become a reality.

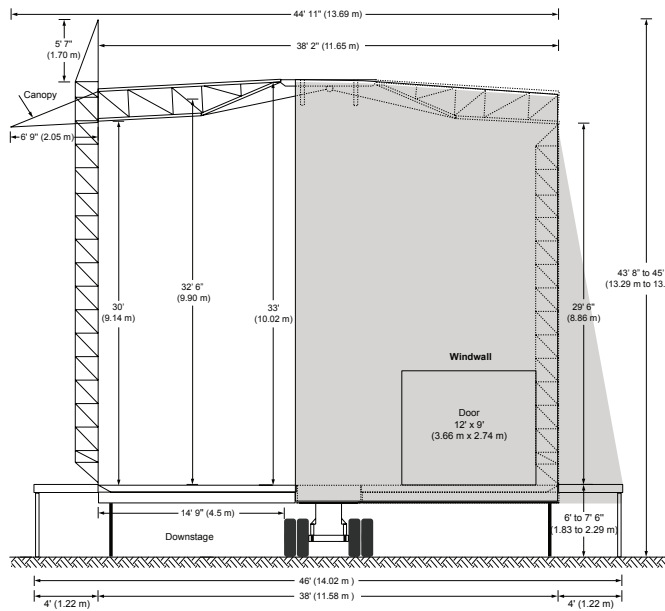

The **SAM 555** is a convenient and economical option for any outdoor event. See full technical specifications below or contact **615-315-0802** for additional information.
